for H.O.C.S.B. organization

1 to 2 - The plan as proposed is "food for thought," and while there is some merit to it, there is some question as to the feasibility of adapting such a program to a small specialized career group. There may be some question as to the semantics of the first sentence, paragraph one (1), but I believe the writer is referring to his ignorance regarding a firm career program for physicians, rather than the objectives and responsibilities of the Medical Staff.

I believe the writer is well-intentioned; however, the recommendations are unrealistic. A normal general practice life is considered adequately refreshed by a 2 week to 3 months postgraduate exercise during any ten year period. This program would mean that we must have an overstrength of 3 to 4 physicians on the payroll and unproductive at all times. While it may sound well from some directions, I can not endorse the idea. EWG
